

an find and use measures of center to analyze and interpret data.

Measures of center

★ mean - average. Add up all of the data and divide by the "number" of numbers.

★ median - in order from least to greatest, it is the middle number
if there are 2 middle #'s, you find the average

★ mode - the # that shows up the most

↳ no mode (all happen the same)

→ 1 mode

→ multiple modes

★ range - highest # subtract the lowest # difference
