

1/20/19

Lesson 1.2.5

can use the multiplicative identity property to create equivalent fractions.

Multiplicative Identity Property:

Anything times 1 is itself

$$1 \cdot a = a$$

The Giant/Big 1

$$\frac{1}{5} \cdot \frac{3}{3} = \frac{3}{15}$$

When we multiply by a fraction that represents one-whole, we create equivalent fractions.

please complete: 1-96, 1-98, 1-99, 1-101

if you have time: 1-100
